Hello, world!

Good afternoon!

Add a file to the png folder

Choose any png file that you like (and which is royalty free, not too big), and place it on your drive to the /png/subfolder of your local repository copy. The name of the png file should be changed below:

```
# By the way this is how you include a png file as illustration from  
# ../png/<your_filename>.png  
knitr::include_graphics(here("png", "1200px-Sunflower_sky_backdrop.jpg"))
```

Sync it with us!
